

Vislink AirPro Service

Satellite Data Service Wherever You Are

Do you need lightning fast, guaranteed bandwidth wherever you are?

Everywhere

The Vislink AirPro Service leverages the Eutelsat Tooway™ system to offer you the data service you need anywhere within the KA-SAT coverage footprint.

Flexible

If you require wide-ranging mobility with bandwidth on demand, select the Tooway NewsSpotter service.

- PAYG data
- No monthly fees
- Inter-beam roaming
- Bookable contention-free capacity
- Ideal for video streaming applications

If you require a flexible local service, choose the Tooway Business service:

- Subscription service
- A range of monthly bandwidth packages
- Fixed beam operation
- Contended service
- Ideal for general internet services

The Vislink AirPro service utilizes the Vislink AirPro 75Ka antenna. This is a two-axis motorized driveaway antenna system with full auto-acquisition functionality for the Ka-Sat (Eutelsat) and Viasat HTS satellites (Eutelsat, Tooway™ & Viasat® Exede® services).

Fast

With Vislink AirPro you can get download rates of up to 20Mbps and upload of up to 10MBps.

Simple

Vislink offer the only turn-key solution in the market being both the manufacturer of the antenna system and the supplier of the associated bandwidth service.

Pay as you go or Subscription services are available.

Wherever you are and whatever you want to do, businesses, transport services, oil and gas workers, remote medical, and emergency services users can now obtain high-speed Internet in locations where no other form of communications infrastructure is available.
