

At the heart of the action

Vislink Technologies' award winning satellite solutions are supported by more than 30 years technical expertise. They ensure robust, secure communications whilst delivering low transmission costs for any organisation that needs high quality, reliable satellite transmission.

Explore our range of world-leading satellite communication solutions, including:

- Bandwidth Efficient DVB-S2X modulation
- Latest HEVC Video Compression Technology
- Field proven robust antenna designs
- Turn-key systems including design, build and installation
- One stop shop bundles of hardware and bandwidth

ENTRY LEVEL SYSTEM

- Designed for non-technical operators
- Small, lightweight and energy efficient
- All IP solution, ideal for video streaming

MID LEVEL SYSTEM

- Ideal for small events and news applications
- Available with IP modems or Vislink's leading edge HEVC DVB-S2X encoder modulator
- Upgradable to full redundancy

HIGH LEVEL SYSTEM

- Ideal for critical communications i.e major live events
- High power, high reliability, multi carrier capable system
- Best solution available on the market
